Connecting two worlds

Technical team

Business team

Benefits of CI / CD

1. Technologists can help business leaders to make better decisions.
2. People with business mindset often see strategy more quickly than technologist.
3. CI / CD can help to bring the two parties together.
4. CI / CD can help to reduce costs in many ways. Just to mention a few: developers make fewer errors and they correct them easily. This translates into more hours of development and better product.
5. CI / CD can help to decrease time between development and production, therefore business stakeholders can see rapidly the continuous changes in the product.

Benefits of CI / CD (cont.)

6. Processes are repeatable and less prone to failure.

7. Technical team decreases the response time upon business teams new requests.
